

CASE STUDY

PAY PER CLICK & GOOGLE ADS CAMPAIGN

CHALLENGE

Sacred Touch Wellness was working with a national agency who was driving low-quality traffic through their paid search campaigns, returning poor ROI for their spend. Their PPC campaign was providing high traffic, but no conversions/leases.

Sacred Touch Wellness Bahamas is ultimate destination for essential balance through Massage & Wellness. The certified massage therapists provide a range of wellness treatments such as deep tissue massage, cupping massage, mud and salt scrubs, etc.

CASE BACKGROUND

Markup Digi has built two websites for Sacred Touch Wellness and has managed their on-going SEO campaigns for several years, but Sacred Touch Wellness was using a national agency for their paid search marketing. This national agency was providing traffic through high PPC spend, yet there were very few conversions (form submissions and phone calls). The high cost of unqualified traffic resulted in low occupancy rates.

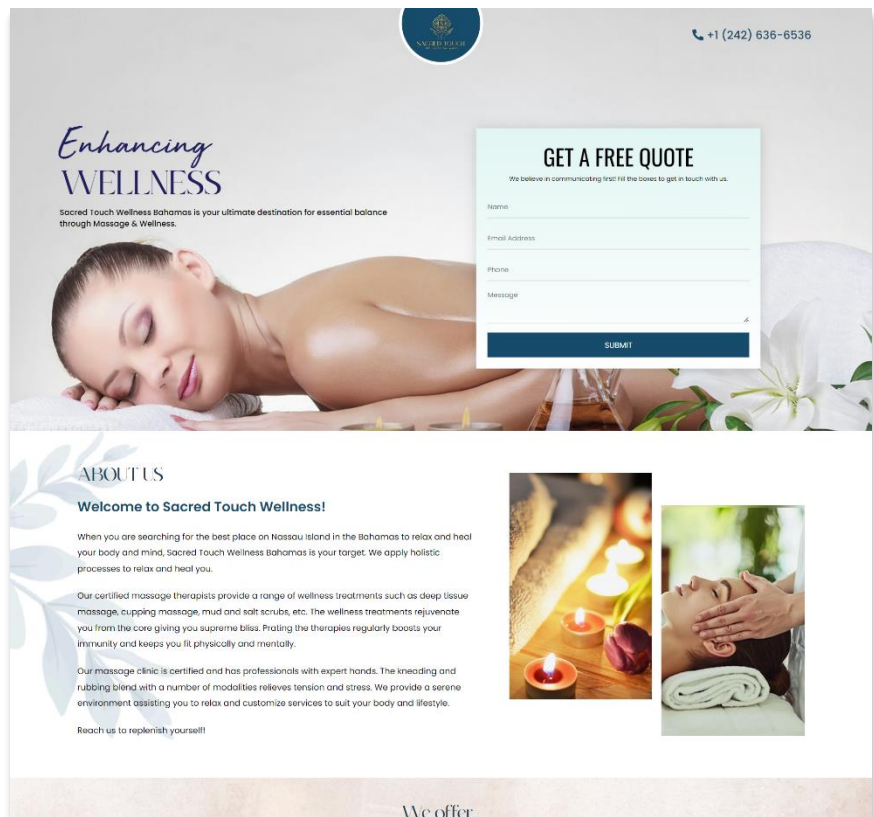

SOLUTION

In March 2022, Markup took over the PPC marketing campaign for Sacred Touch Wellness. Without having historical data openly shared from the previous agency, Markup did extensive keyword research and market analysis to create campaigns that targeted their ideal resident. Our initial goal was to eliminate the low-quality traffic, while driving an increase of traffic likely to convert into new leases.

Campaigns were strategically created according to apartment needs that Sacred Touch Wellness is capable of filling. Because the specific needs of someone looking to live near the National Institutes of Health differ from someone looking for short-term corporate housing, Markup made sure that the different campaigns had separate budgets and tailored ad copy to most effectively reach their target audience.

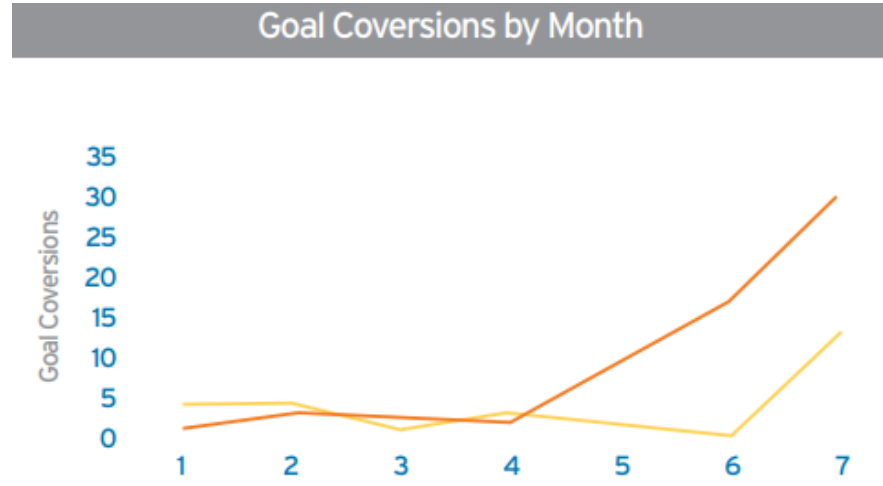

After the strategy was set in place, Markup focused on building a strong landing page that was designed to convert visitors into residents.

Using best practice conversion optimization strategies, Markup created and continually tests many different elements of the landing page. Using heat map tools to measure user behavior, Markup monitored engagement and made changes to improve both the user experience and lead generation.

RESULTS

Over the first half of the year, bounce rate and average session duration all improved by 19%. During that same time, form submissions increased by 35% in comparison to the first six months of 2022. Conversion rate increased by 111%, an illustration that the paid traffic Markup was delivering to the Sacred Touch landing page was much higher quality than before.

Most importantly, Sacred Touch’s occupancy increased by 11 total percentage points, an increase of 13% year over year.

CONCLUSION

After taking over the Sacred Touch paid search campaign, Markup was able to increase the amount of quality traffic, increase the goal conversions, and engage new prospective tenants in a way the previous agency was unable to, all without increasing their monthly budget.

Today, Markup continues to manage all of Sacred Touch’s search engine marketing campaigns, which make up a combined 72% of total website traffic.

“Markup has done for us what the previous agency couldn’t: deliver on the promise of improved performance. Markup has been our go-to marketing firm for many years. They came through for us in the print media days and have been equally strong in this digital era. Having all of our digital marketing in the hands of a company we trust makes all the difference.”
